OBJECTIVES: FRONTIER/FDE TECH PM IN APPLIED-AI, DELIVERY EXCELLENCE

25-year IT career with a decade at Microsoft leading Azure Cloud and AI delivery for Fortune 500 enterprises, now in the Frontier/FDE model, driving Idea to Design with Applied-AI and program managing Code to Launch with engineering and product teams. A Technical Program Manager rooted in software engineering who does not stop at the deck: personally designs and ships agentic systems (PRDs, SDDs, agent graphs, MCP tool use, RAG over curated data, evals and human-in-the-loop governance). Drives 0→1 from first principles and design thinking, turning an ambiguous problem into a hi-fi, clickable prototype before any production code, then leads cross-functional teams of engineers, architects and vendors through Agile, SAgE and hybrid delivery to launch.

KEY PROFESSIONAL SKILLS

Applied-AI Delivery & the Frontier/FDE Model: 10 years at Microsoft delivering Azure Cloud, AI and Copilot programs for Fortune 500 clients. Works forward-deployed, embedded with customer engineers to take an ambiguous problem from Idea to Design, then program manages Code to Launch with engineering and product teams. End-to-end lifecycle ownership: scope, schedule, budget, RAID log, governance, and enterprise data-architecture and security alignment.

Agentic Architecture: Designs and builds the systems, not just the plan. Agent graphs and stateful orchestration (LangGraph, Claude Agent SDK), MCP connectors and function calling for deterministic tool use, RAG grounded in curated golden datasets, multi-provider routing across Claude, GPT and Gemini, and regression evals plus human-in-the-loop verification as release gates.

0→1 from First Principles: Decomposes a problem to its irreducible parts, then uses design thinking to reach a hi-fi, clickable prototype stakeholders can react to before production code exists, compressing discovery-to-alignment from months to days and giving engineering a spec it can build against rather than a document to interpret.

Stakeholder Management & Program Governance: Translates complex technical concepts into clear updates for executive stakeholders. Manages plans, milestones, dependencies, budgets, risks and change requests; tracks OKRs, KPIs and delivery health in Monthly Business Reviews across Scrum, SAgE and hybrid models using Azure DevOps.

Pursuit Leadership & Go-to-Market: Intake, design and approval of consulting solutions driving deal velocity through technical proposals, WBS, staffing plans, pricing models, Statements of Work, Work Orders and Amendments. Manages P&L health, forecasting and CSAT alongside sales and delivery executives.

KEY ACTIVITIES & PROGRAMS

Azure Platform, Copilot & Analytics Delivery: Plans and manages end-to-end delivery of Azure data platform, analytics and AI initiatives across Azure OpenAI and AI Foundry, AI Search and RAG, Microsoft Fabric and Copilot rollouts, from roadmap and WBS to go-live.

Prototype-Led Discovery: Replaces requirements-by-committee with a working artifact: first-principles framing and design-thinking workshops that land on a hi-fi prototype, so scope, architecture and success criteria are agreed against something people can click.

Evals, Guardrails & Responsible Deployment: Treats AI features as testable systems: regression evals before rollout, human-in-the-loop verification on model confidence, grounding in vetted data to control hallucination, plus secrets, audit and governance designed in from the start.

Globalization & Localization at Scale: Ships product in every market, not just English: String Catalogs and locale-aware formatting on Apple platforms, RTL and pseudo-localization audits, machine-translation post-editing through vendors, and retrieval grounded in vetted terminology so quality holds across every language and market.

KEY ACHIEVEMENTS

- ★ Azure Cloud and AI, M365 and Dynamics implementation programs for Fortune 500 clients at Microsoft Professional Services
- ★ Fluent in AI-driven solutions and agentification, powering data-driven decisions across the portfolio
- ★ Landed and championed a multitude of Global Programs enabling nearshore and offshore software factory, Agile adoption, CMMI implementation, Risk Management and Lessons Learned, consulting deal and delivery process automation, IP harvesting, OKR/KPI telemetry and project health reviews
- ★ Built a Modern Applications professional services practice from the ground up, leading a group of 22 people at peak and delivering services to U.S. Postal Service, Schlumberger and HangIT

Microsoft · 10 years

July 2016 – Present

Principal Technical Program Manager

Richmond, VA

Leads end-to-end technical program management of Azure Cloud, data platform and AI initiatives for Fortune 500 clients, increasingly in a Frontier/FDE model, embedded with customer engineering to take problems from Idea to Design, then driving Code to Launch with product and feature teams. Delivered Azure AI, Azure OpenAI and enterprise Copilot programs from planning through go-live, alongside Azure Data Lake implementations and Tableau-to-Power BI migrations. Architects the agentic layer hands-on: agent graphs and orchestration, MCP tool use, RAG grounded in curated data, model routing, and regression evals with human-in-the-loop verification as release gates, including companion agents (Delivery, Pursuit, Sales) now used for portfolio-wide monitoring. Coordinates engineers, cloud architects, analysts and vendors via Azure DevOps across Agile and SAFe; owns plans, milestones, risk registers, budgets and executive communication, tracking OKRs, KPIs, P&L health and CSAT across a multi-million-dollar portfolio.

Dexian-Disys · 6 years

Nov 2010 – Jun 2016

Practice Manager, Application Development

Washington D.C. Metro

Head of delivery, technical sales prospecting, and oversight of all operations and projects under the Practice. Built a Modern Applications professional services practice from the ground up leading a group of 22 people at peak delivering services to U.S. Postal Service, Schlumberger and HangIT. Full lead-to-order and order-to-cash process ownership. Forecasting, strategic planning, contracts closure and sale profitability analysis.

Meta Brasil · 8 years

Sep 2002 – Oct 2010

Dev Lead → IT Consultant → Technical Program Manager

Porto Alegre, Brazil

Designed and enhanced IT consulting service offerings, project management and sales prospecting for software development projects, implementation of management methodologies, outsourcing operations, and counseling clients for optimized IT & Business integration via PMO.

Dinamize Web Systems · 4 years

Aug 2000 – Jul 2004

Full Stack Software Engineer

Porto Alegre, Brazil

Where it all began. Built client-server and web-based applications using Delphi, Visual Basic, ASP.NET, and SQL Server. Developed foundational skills in database administration, UX/UI wireframing, and product engineering.

VOICES

"Fernando is one of the most knowledgeable and effective resources I have come across in my +20yrs at MSFT. Your approach and structured working style keeping Team on point for the multitude of tasks and approvals it takes is SUPER. VERY few can accomplish this."

Adam R.

Account Delivery Executive · Microsoft

"I have unwavering confidence in everything you do. I have witnessed your exponential growth over the years. You are intentional, focused, and do not shy away from challenges. I genuinely see you as a leader in your field."

Dawna C.

Enterprise Account Delivery Lead · Microsoft

"Strong technical acumen and genuine depth in AI, including testing, evaluation, and applied projects. An excellent communicator, effective at engaging stakeholders at all levels, who builds buy-in and shows real curiosity about the business and the team."

Stephen W.

Senior Leader · Microsoft

"Fernando and I are on the same page 99% of the time, which makes it really easy to work through issues when they arise. He is a very collaborative partner and is genuinely interested in coming up with acceptable solutions to very difficult challenges, often in extremely tight timelines."

Joe N.

Architect Manager · Microsoft
