SUMMARY

25-year IT career with a decade at Microsoft leading Azure Cloud and AI platform delivery for Fortune 500 enterprises. Technical Project Manager rooted on a software engineering background, with deep expertise managing end-to-end delivery of on-prem to cloud implementations, data platform, analytics, and AI initiatives — spanning Azure Data Lake, Databricks, Azure AI, Copilot Studio, Power BI, Dynamics, M365 and Power Platform. Proven ability to coordinate cross-functional teams of data engineers, cloud architects, analysts, and external vendors while translating complex technical programs into the clear executive outcomes as an expert in Agile, SAFe, and hybrid delivery methodologies.

KEY PROFESSIONAL SKILLS

- Azure Cloud, Data & AI Platform Delivery:** 10 years at Microsoft managing Azure Cloud modernization and AI implementation programs for Fortune 500 clients. Hands-on experience designing and governing Azure Cloud, Data and AI — including Databricks partnerships, Azure AI and Copilot Studio deployments, and enterprise migrations from Tableau to Power BI. End-to-end project lifecycle ownership: scope, schedule, budget, RAID Log, stakeholder communication, and delivery governance aligned to enterprise data architecture and security standards.
- Cross-Functional Teams Leadership:** Coordinates and orchestrates delivery teams across data engineers, cloud architects, analytics leads, business analysts, and external vendors. Champions buy-in from collaborating organizations on solution approach, architecture decisions, and delivery plans. Full-cycle hands-on oversight from presales through production deployment, using Azure DevOps and ServiceNow as primary project and Agile tooling across Scrum, SAFe, and hybrid delivery models.
- Stakeholder Management & Program Governance:** Translates complex technical concepts into clear, actionable updates for executive and business stakeholders. Develops and manages project plans, milestones, dependencies, and budgets; proactively manages risks, issues, and change requests. Tracks OKRs, KPIs, and delivery health metrics in Monthly Business Reviews. Workflow leveraging AI Companion agents (Delivery, Pursuit, Sales) to drive portfolio-wide data-driven monitoring and accelerated issue resolution.

KEY ACTIVITIES & PROGRAMS

- Azure Platform & Analytics Program Delivery:** Plan and manage end-to-end delivery of Azure data platform, analytics, and AI initiatives — from roadmap and WBS through stakeholder sign-off and go-live. Governed Azure Data Lake and Databricks implementations, Power BI adoption programs, and enterprise Tableau decommissioning projects at ExxonMobil, GM, and Press Ganey.
- Agile & Hybrid Delivery Execution:** Drives delivery cadence across Scrum, SAFe, and hybrid models using Azure DevOps and ServiceNow. Manages sprint planning, backlog grooming, milestone tracking, dependency mapping, and velocity reporting for multi-track data engineering and analytics workstreams.
- Risk, Governance & Automation:** Proactively identifies and manages delivery risks, issues, and change requests against enterprise data architecture, governance, and security standards. Incorporates Agentic AI-based risk assessment and automation tooling to reduce manual overhead, surface patterns early, and accelerate resolution across program portfolios.
- Pursuit Leadership & Go-to-Market:** Intake, design, and approval of consulting solutions driving deal velocity through technical proposals, WBS, staffing plans, pricing models, Statements of Work, Work Orders, and Amendments. Manages P&L health, financial forecasting, and customer satisfaction metrics alongside sales and delivery executives.

KEY ACHIEVEMENTS

- ★ Azure Cloud, M365, Dynamics, and AI Implementation Programs for Fortune 500 clients over 10 years at Microsoft Professional Services
- ★ Workflow leveraging AI Companion agents (Delivery, Pursuit, Sales) for portfolio-wide monitoring and data-driven decision-making
- ★ Solution design and delivery oversight of Azure Data Lake + Databricks platform at ExxonMobil and GM, including enterprise Tableau-to-Power BI analytics migration
- ★ Founded Scrum-Agile App Dev Practice at Dexian-Disys from zero — delivering for USPS, ExxonMobil, Schlumberger & Hanglt

Microsoft · 10 years July 2016 – Present

Technical Project Manager · Azure Cloud & AI Professional Services · Richmond, VA

Led end-to-end technical project management of Azure data platform, analytics, and AI initiatives for Fortune 500 clients. Governed Azure Data Lake and Databricks implementations, managed enterprise Tableau-to-Power BI analytics migrations, and delivered Azure AI and Copilot Studio programs from planning through go-live. Coordinated cross-functional teams of data engineers, cloud architects, analysts, and external vendors using Azure DevOps across Agile and SAFe delivery models. Managed project plans, milestones, risk registers, budgets, and stakeholder communications; tracked OKRs, KPIs, P&L health, and CSAT across a multi-million-dollar portfolio. Developed and deployed Agentic AI companion agents (Delivery, Pursuit, Sales) for portfolio-wide monitoring and data-driven decision-making.

Dexian-Disys · 6 years Nov 2010 – Jun 2016

Practice Manager, Application Development · Houston, TX → Washington D.C. Metro

Head of delivery, technical sales prospecting, and oversight of all operations and projects under the Practice. Defined and built from the ground up an Application Development Practice. Full lead-to-order and order-to-cash process ownership. Forecasting, strategic planning, contracts closure, sale profitability analysis, and market trend monitoring.

Meta Brasil · 8 years Sep 2002 – Oct 2010

Dev Lead → IT Consultant → Technical Program Manager · Porto Alegre, Brazil

Designed and enhanced IT consulting service offerings, project management and sales prospecting for software development projects, implementation of management methodologies, outsourcing operations, and counseling clients for optimized IT & Business integration via PMO.

Dinamize Web Systems · 4 years Aug 2000 – Jul 2004

Full Stack Software Engineer · Porto Alegre, Brazil

Where it all began. Built client-server and web-based applications using Delphi, Visual Basic, ASP.NET, and SQL Server. Developed foundational skills in database administration, UX/UI wireframing, and product engineering.

ACADEMIC BACKGROUND

Master's in Business Strategy Unisinós · Magna cum laude · 2011	B.S. Computer Science PUC-RS · Summa cum laude · 2007
Associate's in Software Engineering Escola Técnica Santo Inácio · 2002

VOICES

"Fernando is one of the most knowledgeable and effective resources I have come across in my +20yrs at MSFT. Your approach and structured working style keeping Team on point for the multitude of tasks and approvals it takes is SUPER. VERY few can accomplish this."

Adam Ryncarz
Ford/GM/Cruise Account Delivery Executive · Microsoft

"I have unwavering confidence in everything you do. I have witnessed your exponential growth over the years. You are intentional, focused, and do not shy away from challenges. I genuinely see you as a leader in your field."

Dawna Covey
Enterprise ADL · Microsoft

"Fernando has a can do attitude. Even on areas outside of his remit, he has leaned in to support the team. Fernando is a joy to work with."

Melissa Hooper
Sales Director · Microsoft

"Fernando and I are on the same page 99% of the time, which makes it really easy to work through issues when they arise. He is a very collaborative partner and is genuinely interested in coming up with acceptable solutions to very difficult challenges, often in extremely tight timelines."

Joe Newel
Architect Manager · Microsoft
